Pablo Javier Sandoval

Systems Engineering student | Entry-level IT

Limerick, Ireland · psandoval@miumg.edu.gt · github.com/Paxmer

PROFILE

Final-year Systems Engineering student with a solid base in programming, databases, networking and software engineering. I build and publish my own projects, including a full-stack online banking system (PHP, MySQL, 145 automated tests), and I work as a freelance web developer. I am familiar with AI-assisted development tools and modern platforms such as Claude Code, Codex, n8n, Supabase and Vercel, and on my own initiative I am learning Python and preparing for the AWS Certified AI Practitioner certification. Running my own business has given me real experience in sales, customer service and leading a team. I am looking for an entry-level IT opportunity where I can apply my technical skills and keep growing.

TECHNICAL SKILLS

Programming	C, C++, C#, JavaScript, PHP, Java, Python (learning)
Web	HTML5, CSS3, JavaScript, PHP, Apache, deployment (Cloudflare Workers, free hosting)
Databases	SQL, MySQL (stored procedures, transactions), SQL Server
Security & testing	bcrypt password hashing, CSRF protection, role-based access control, automated testing
Systems & networks	Windows Server, computer networks, Cisco Packet Tracer, operating systems
Tools	Git and GitHub, Microsoft Excel and Office, command line (CMD), Logisim
AI & modern dev	Claude Code, Codex, n8n (workflow automation), Supabase, Vercel

PROJECTS

Banco PJS – Online banking system PHP, MySQL, HTML5, CSS3, Apache — Code · Live demo

- Built a full-stack banking application with three user roles (customer, cashier, administrator) and transactional money transfers using MySQL stored procedures.
- Added bcrypt password hashing, CSRF protection and role-based access; wrote 145 automated tests; deployed online.

Freelance web development

- Built and published demo websites on Cloudflare Workers; currently building a website for Ambika Guatemala.

Academic group projects Mariano Gálvez University

- Barbershop appointment and service management system: systems analysis in two phases, with DERCAS and final report.
- "The Journey of a Packet": network simulation in Cisco Packet Tracer with a companion website.
- Edge computing cluster for local AI inference (team of four, low-cost hardware, predictive-maintenance use case).

EXPERIENCE

Founder & Sales Manager, American Visa Experts · Remote, Latin America — September 2022 – Present

- Founded the business and manage all operations and commercial strategy; lead a team of 2 employees.
- Consistently achieve 20+ successful monthly sales of immigration services (consulting, appointments, documentation).
- Built custom Excel forms to collect client data for US visa applications; extended to Canadian forms (IMM 5257, IMM 5645).

Childcare Cook, Northside Family Resource Centre · Limerick, Ireland — November 2025 – Present

- Prepare meals in a childcare setting, following established procedures and food safety standards.
- Manage stock counts and maintain supply records; work as part of a team in a busy kitchen.

Crew Member, McDonald's Jetland · Limerick, Ireland — September 2024 – October 2025

- Over a year in a high-volume environment, building teamwork, communication, time management and customer service.

EDUCATION

Systems Engineering, Mariano Gálvez University · Guatemala (online) — February 2021 – Present

- Final year, expected completion in late 2027. Coursework: programming, databases, computer networks, operating systems, systems analysis, digital electronics and software engineering.

English language courses, Student Campus · Limerick — November 2025 – June 2026

- Completed the course programme, reaching B2 level.

Certifications · Cisco Networking Academy, Udemy

- Cisco CCNA modules 1–3 (Introduction to Networks; Switching, Routing and Wireless Essentials; Enterprise Networking, Security and Automation); Advanced Excel (Udemy, 2026).

Self-directed learning · Cloud and programming

- Preparing for the AWS Certified AI Practitioner certification; learning Python.
